AI & Automation	Claude Code, ChatGPT, Emergent, Lovable, Make.com Automation
Soft Skills	Problem Solving, Client Communication, Attention to Detail, Fast Learner

EXPERIENCE

Freelance Full Stack Developer2026 — Present

Self-Employed · Remote · Philippines

- Designed and developed 20+ custom websites for hotels, resorts, and hospitality businesses worldwide.
- Built full booking systems with admin dashboards, room calendar availability, and payment flows using PHP & MySQL.
- Delivered responsive, SEO-optimized frontends using HTML, CSS, JavaScript, and React.
- Expanded into modern full-stack builds with Next.js, TypeScript, Firebase, and AI-assisted development workflows.
- Collaborated directly with clients from requirements gathering through post-launch support.

Web Development Intern2025 (6 months)

Local IT Solutions Company · Pangasinan, Philippines

- Assisted senior developers in building and maintaining company client websites.
- Contributed to front-end development tasks using HTML, CSS, and JavaScript.
- Participated in code reviews, gaining exposure to industry best practices.

Freelance Web Developer2024

Private Client · United States (Remote)

- Developed a custom website for an adult home care business focused on elderly services.
- Designed and implemented a clean, user-friendly interface tailored for accessibility and trust.
- Worked directly with the client to gather requirements and deliver a fully functional web solution.

KEY PROJECTS

SplitLab — Next.js · TypeScript · Prisma · TiDB · Clerk · Google Gemini API
Self-serve A/B testing and CRO platform built end-to-end — custom tracking script, visitor assignment engine, a statistical significance calculator written from scratch, and an AI assistant generating data-grounded recommendations. Multi-tenant auth and live conversion analytics.

Monster Chef — VR Cookery Simulator — *Unity 6 (C#) · Next.js · Firebase · WebRTC*

A VR cooking classroom built solo for real Cookery students — a Google Cardboard VR experience paired with a live teacher dashboard for approvals, real-time WebRTC monitoring, and grading. Shipped as a university capstone, now in classroom pilot use.

Shwxn Bookstore — *Next.js 14 · Express · Firebase Firestore · Cloudinary · JWT*

Full-stack online bookstore with a public storefront and real-time admin dashboard — live inventory, order tracking via Firestore listeners, shareable PNG/PDF receipts, and auto-generated courier tracking links.

Luxury Heaven Booking System — *PHP · MySQL · JavaScript · Full Stack*

Full-featured hotel management web app with real-time booking flow, admin dashboard, room availability calendar, and customer management system.

Dental & Veterinary Clinic Management Systems — *PHP (MVC) · MySQL · JavaScript · EmailJS*

Full-featured clinic systems with admin dashboards, appointment scheduling, and patient record management, built on MVC architecture with responsive UI and automated email notifications.

Iron Forge Gym Website — *PHP (MVC) · MySQL · JavaScript · EmailJS*

Dynamic gym website with an admin dashboard, membership showcase, service pages, and an integrated email inquiry system.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

2023 — 2026

Pangasinan State University, Philippines

Relevant coursework: Web Systems, Database Management, Software Engineering, Object-Oriented Programming, UI/UX Design
